NGSS 101

Are you interested in transitioning to the Next Generation Science Standards but don't know where to start? Have you heard of the "three dimensions" but don't understand what they are and how they work together? How does engineering fit in to the mix? Join us for a crash course in NGSS!

In these one-day programs you will walk away with a deeper understanding of the NGSS as you explore, engage and discuss this new approach to science education.

Highlights:

- Introduction to NGSS architecture and instructional shifts
- Hands-on exploration of the 3 dimensions of NGSS
- Introduction to the Engineering Design Process

Who: TK-5th grade teachers and coaches

When: July 14, 2018

December 8, 2018

May 18, 2019

8:00 a.m. - 2:30 p.m.

Where: California Science Center
Kresa Educator Resource Hall

Fee: \$125 per participant, which includes:

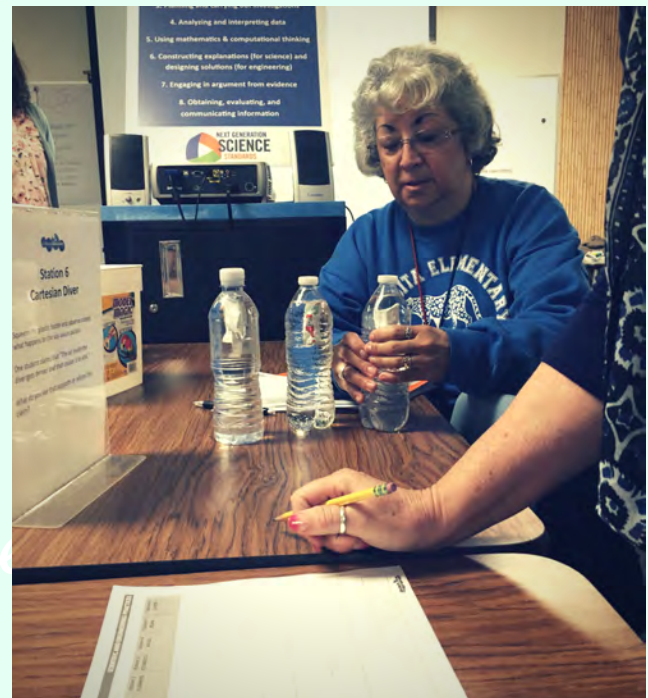

- 6 hours of hands-on NGSS professional learning
- Take-home materials and resources
- Light breakfast, lunch, and parking

Participant Testimonials:

*"Loved the day! So happy to have all the handouts and activities and resources to start using. Thanks for your time, patience, and humor."
"I have always been hesitant about teaching science, but this PD definitely empowered me to teach it next year and from this point on."*

Space is limited. To register, please call (213) 744-2019.

Please bring a laptop computer. WiFi will be provided.
